

BATTLEBALL

THE FUTURE OF ARCADE

INTRODUCTION

Battleball combines the use of cutting-edge technology, authentic golf balls and the retro thrill of arcade machines, designed in a head-to-head format to deliver a fast-paced competitive social experience.

Built as a completely scalable ecosystem of products, you can assemble an entire course of unique machines that are as addictive as they are accessible - whether you're looking to add an experience to your existing venue or create an entirely new concept.

At Rivals Innovation, we have carefully considered the competitor market as well as global customer requirements to build a truly unique product that promotes fun whilst driving incredibly consistent revenue.

Our products have been built from the ground up with global market capture in mind to push the limits of competitive socialising, drive food and beverage revenue whilst providing an unforgettable customer experience.

Designed and engineered in the United Kingdom, our products blend exceptional manufacturing standards with the latest entertainment concepts to meet the demands of venues worldwide.

THE EXPERIENCE

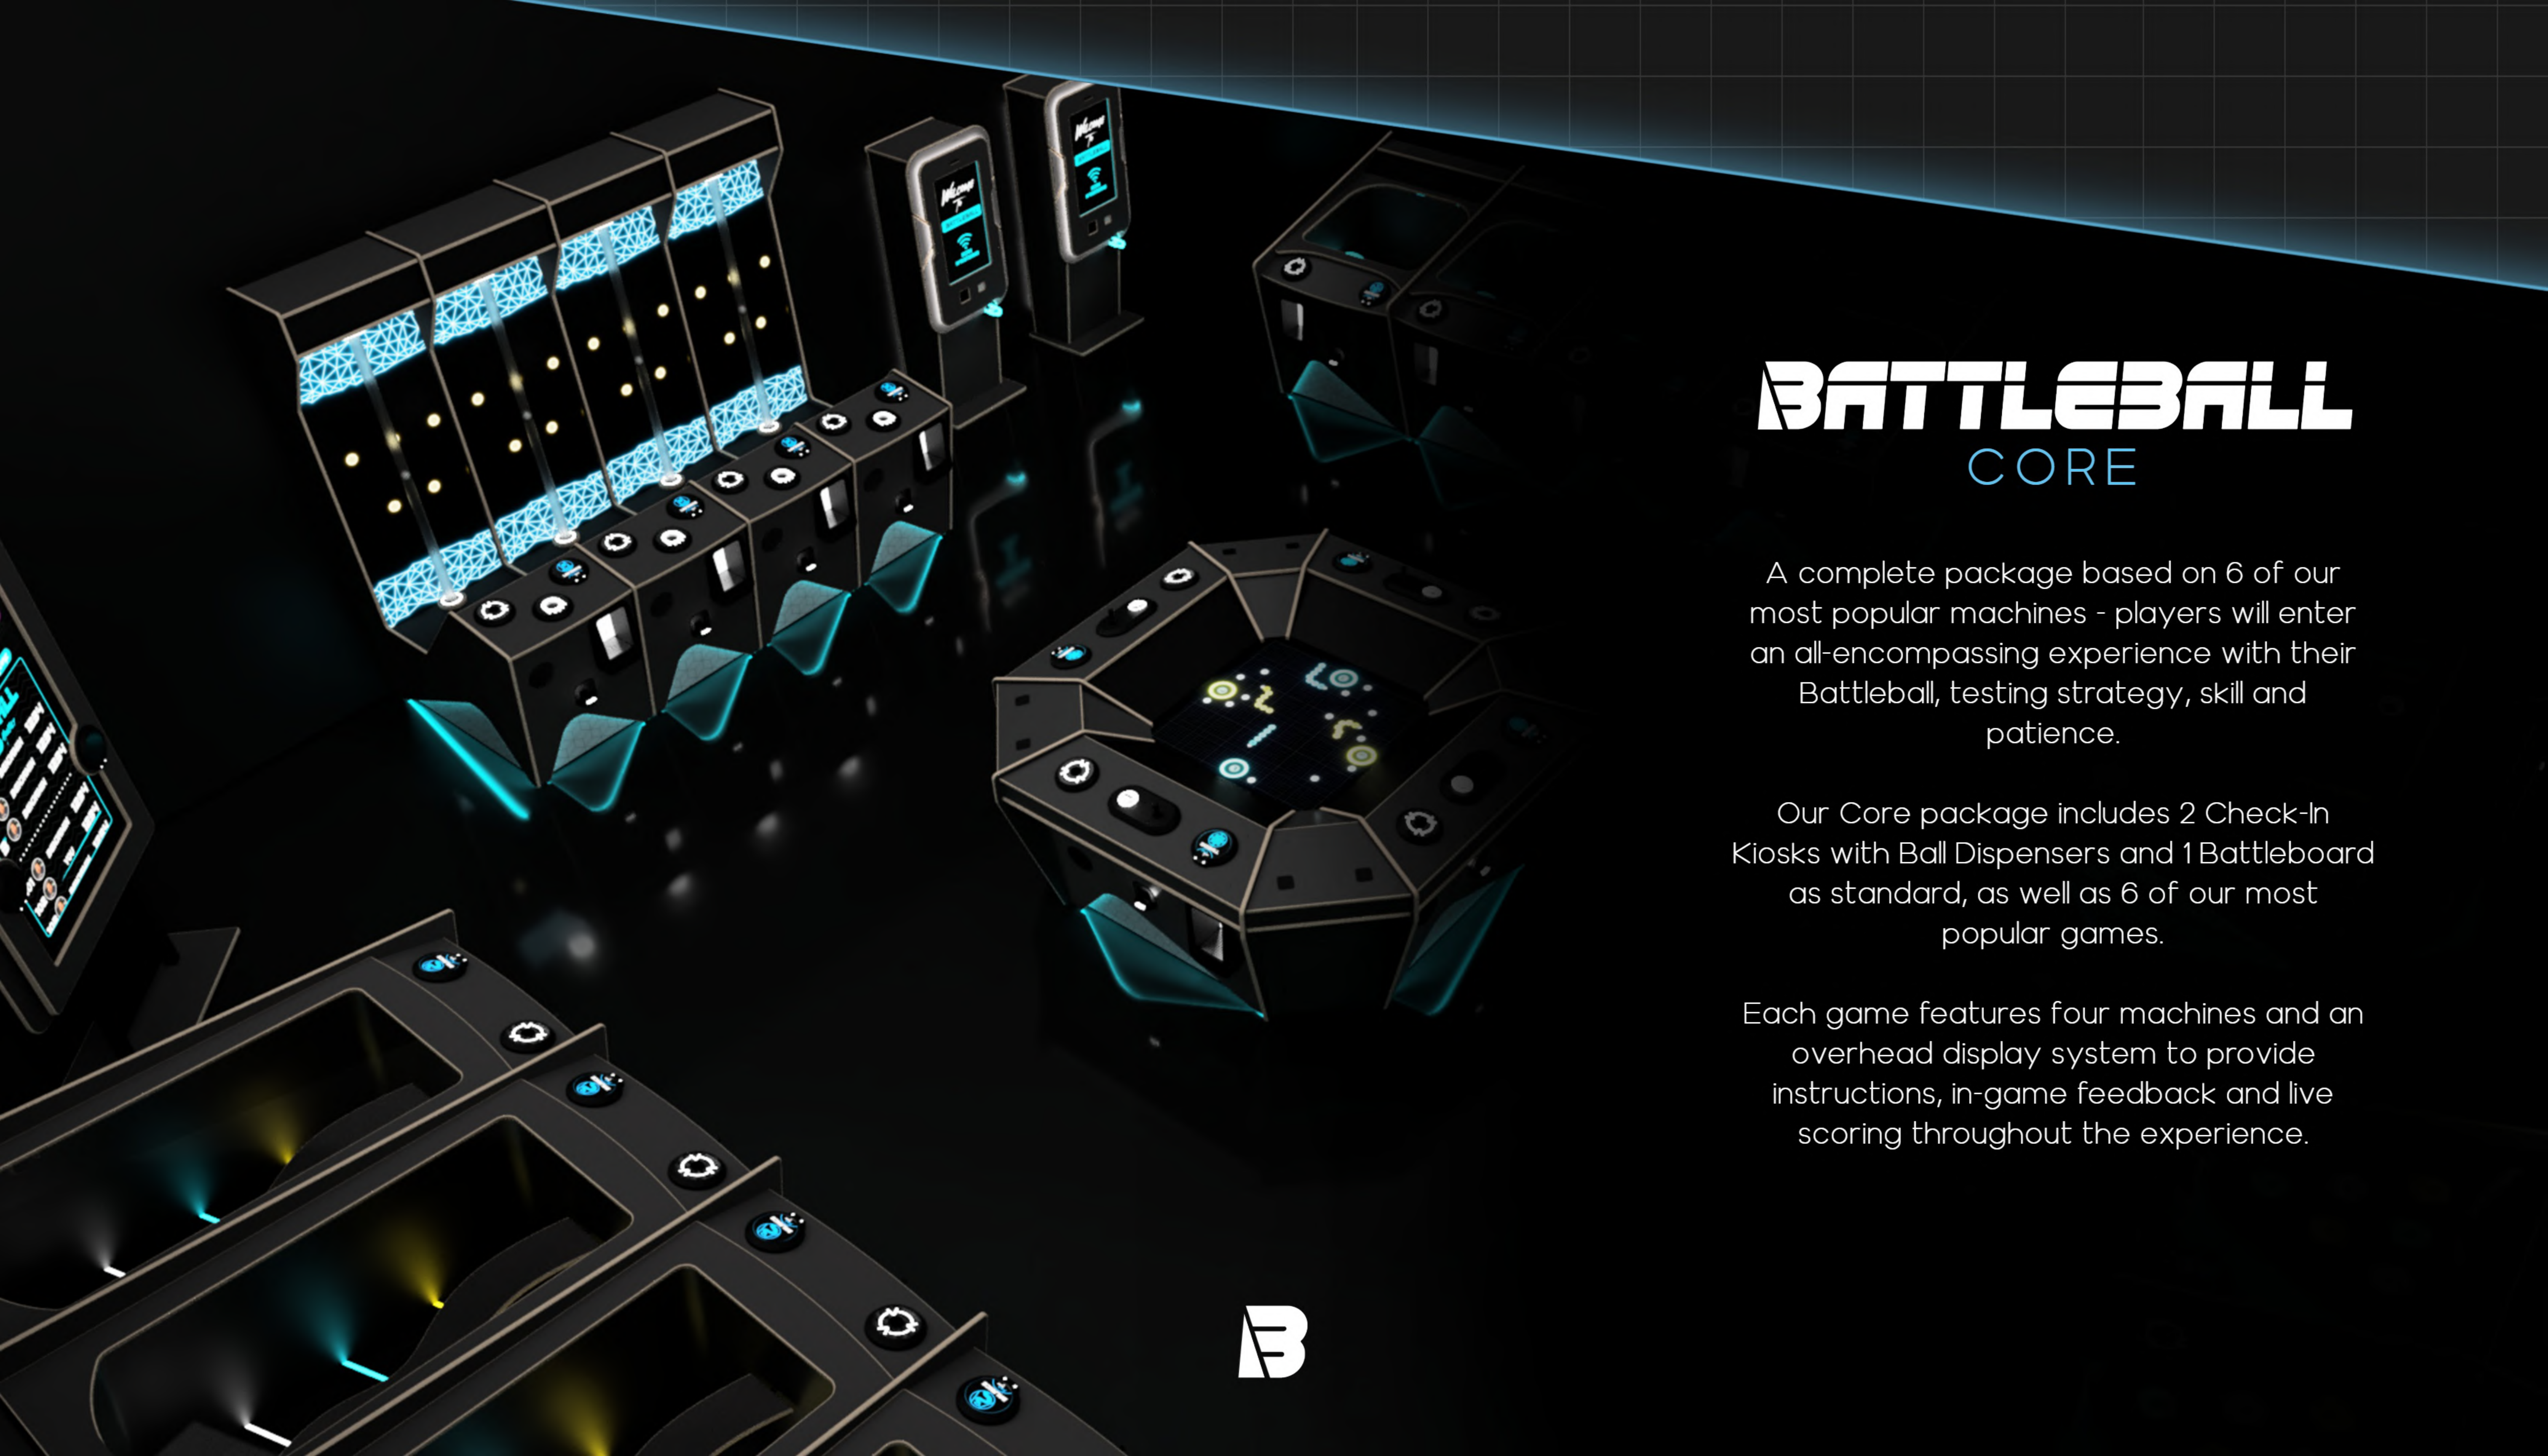

From the moment players check into Battleball via the included Kiosk, the experience begins. Each player receives a unique Battleball, their personal key to accessing and playing each machine in the Battleground.

Playing head-to-head against friends and family, or rivals they have never met before, each player will experience a set of unique high-energy battles, each requiring a different skillset to overcome.

All of our machines are built with seamless check in/out functionality, quick and intuitive instructions, as well as looking after the players beverage of choice during gameplay - promoting an experience that drives food and beverage revenue whilst providing captivating fun for all ages.

As the competition heats up, players will be fighting for their place on the Battleboard - an interactive digital leaderboard that fully tracks all players scores, fuelling friendly rivalry that keeps them coming back for more.

BATTLEBALL

CORE

A complete package based on 6 of our most popular machines - players will enter an all-encompassing experience with their Battleball, testing strategy, skill and patience.

Our Core package includes 2 Check-In Kiosks with Ball Dispensers and 1 Battleboard as standard, as well as 6 of our most popular games.

Each game features four machines and an overhead display system to provide instructions, in-game feedback and live scoring throughout the experience.

CORE SPECIFICATIONS

Whats included?

- 2 Check-In Kiosks (Ball Dispensers)
- 1 Battleboard (Leaderboard)
- 6 4-Player Machines

Example Machines

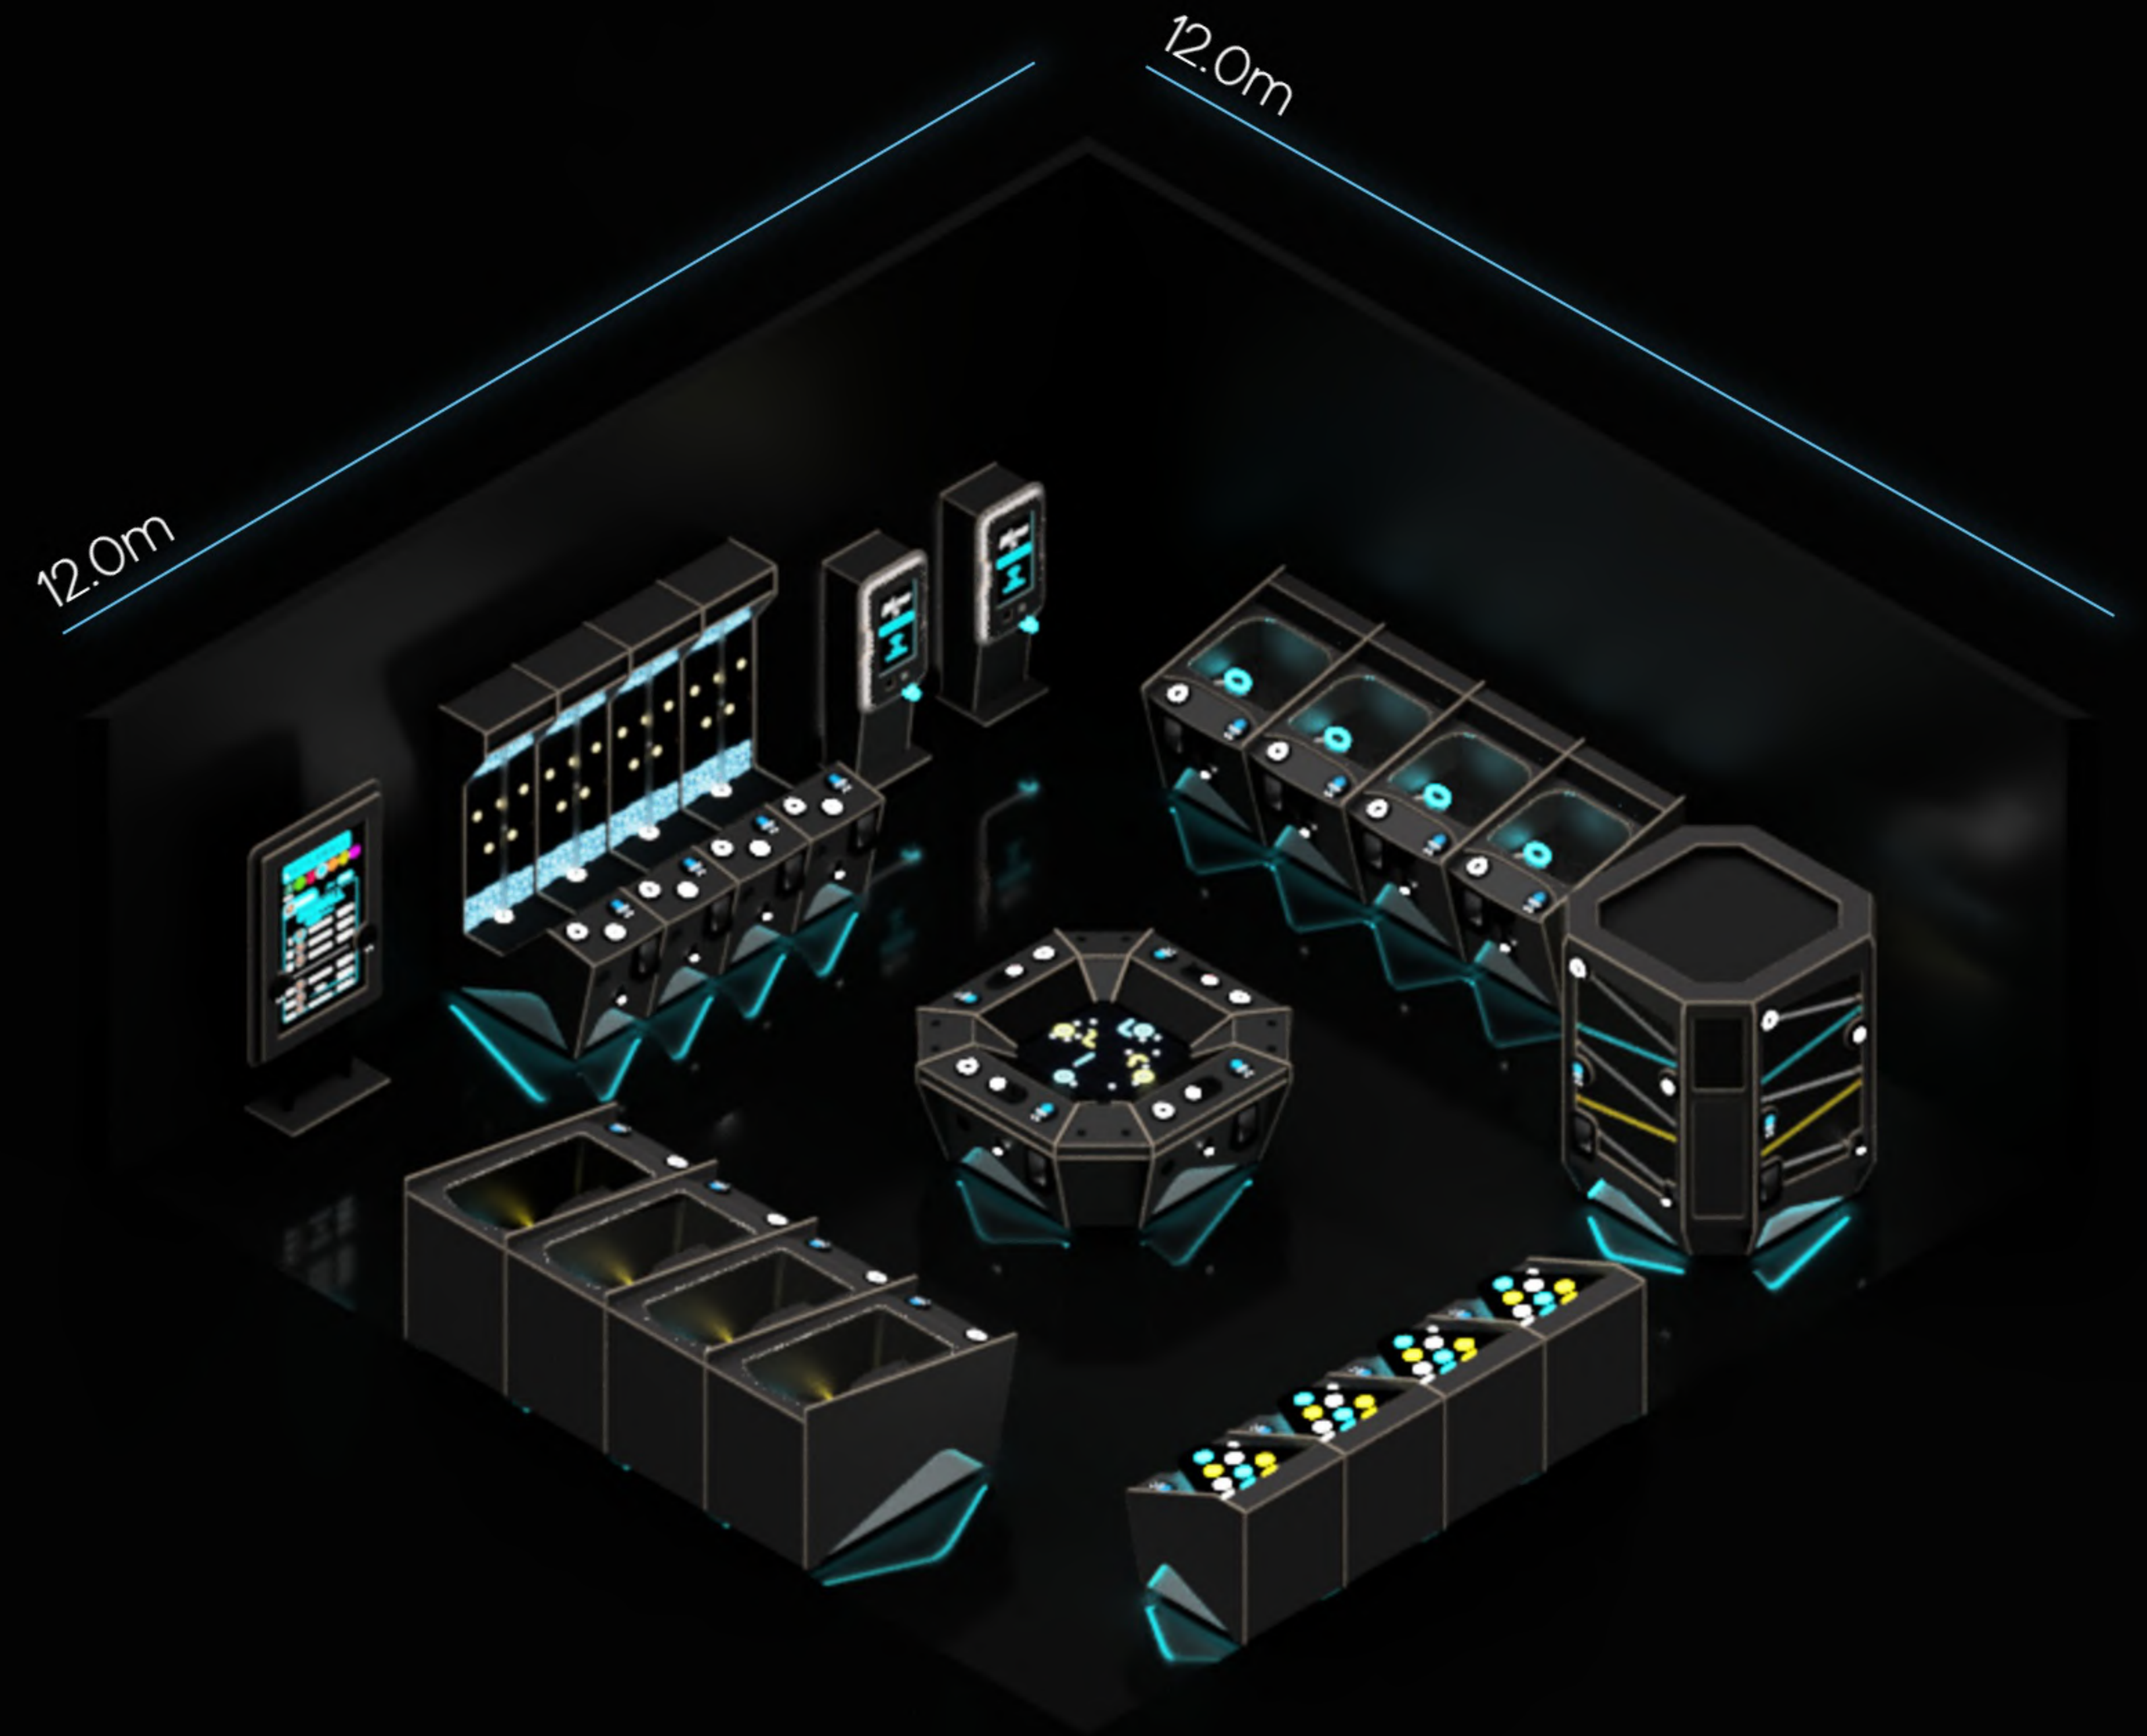

Levitate
Balance
Capture
React
Match
Digiball

Our recommendations

To install the Battleball Core package, we recommend a minimum space of approximately 150sqm.

The Battleball Core setup can accommodate up-to 24 players simultaneously.

Our packages can be configured to your exact space and price requirements - the Core, Plus and Extreme products are just our recommended package options.

BATTLEBALL

PLUS

If space is on your side, Battleball Plus offers an even more intense experience - adding more challenge, interaction and competition to the Core package.

Our Plus package includes 4 Check-In Kiosks and 2 Battleboards as standard, as well as 9 of our most popular games.

Each game features four machines and an overhead display system to provide instructions, in-game feedback and live scoring throughout the experience.

PLUS SPECIFICATIONS

Whats included?

- 4 Check-In Kiosks (Ball Dispensers)
- 2 Battleboards (Leaderboards)
- 9 4-Player Machines

Example Machines

*Capture
Match
Balance
Levitate
Pod*

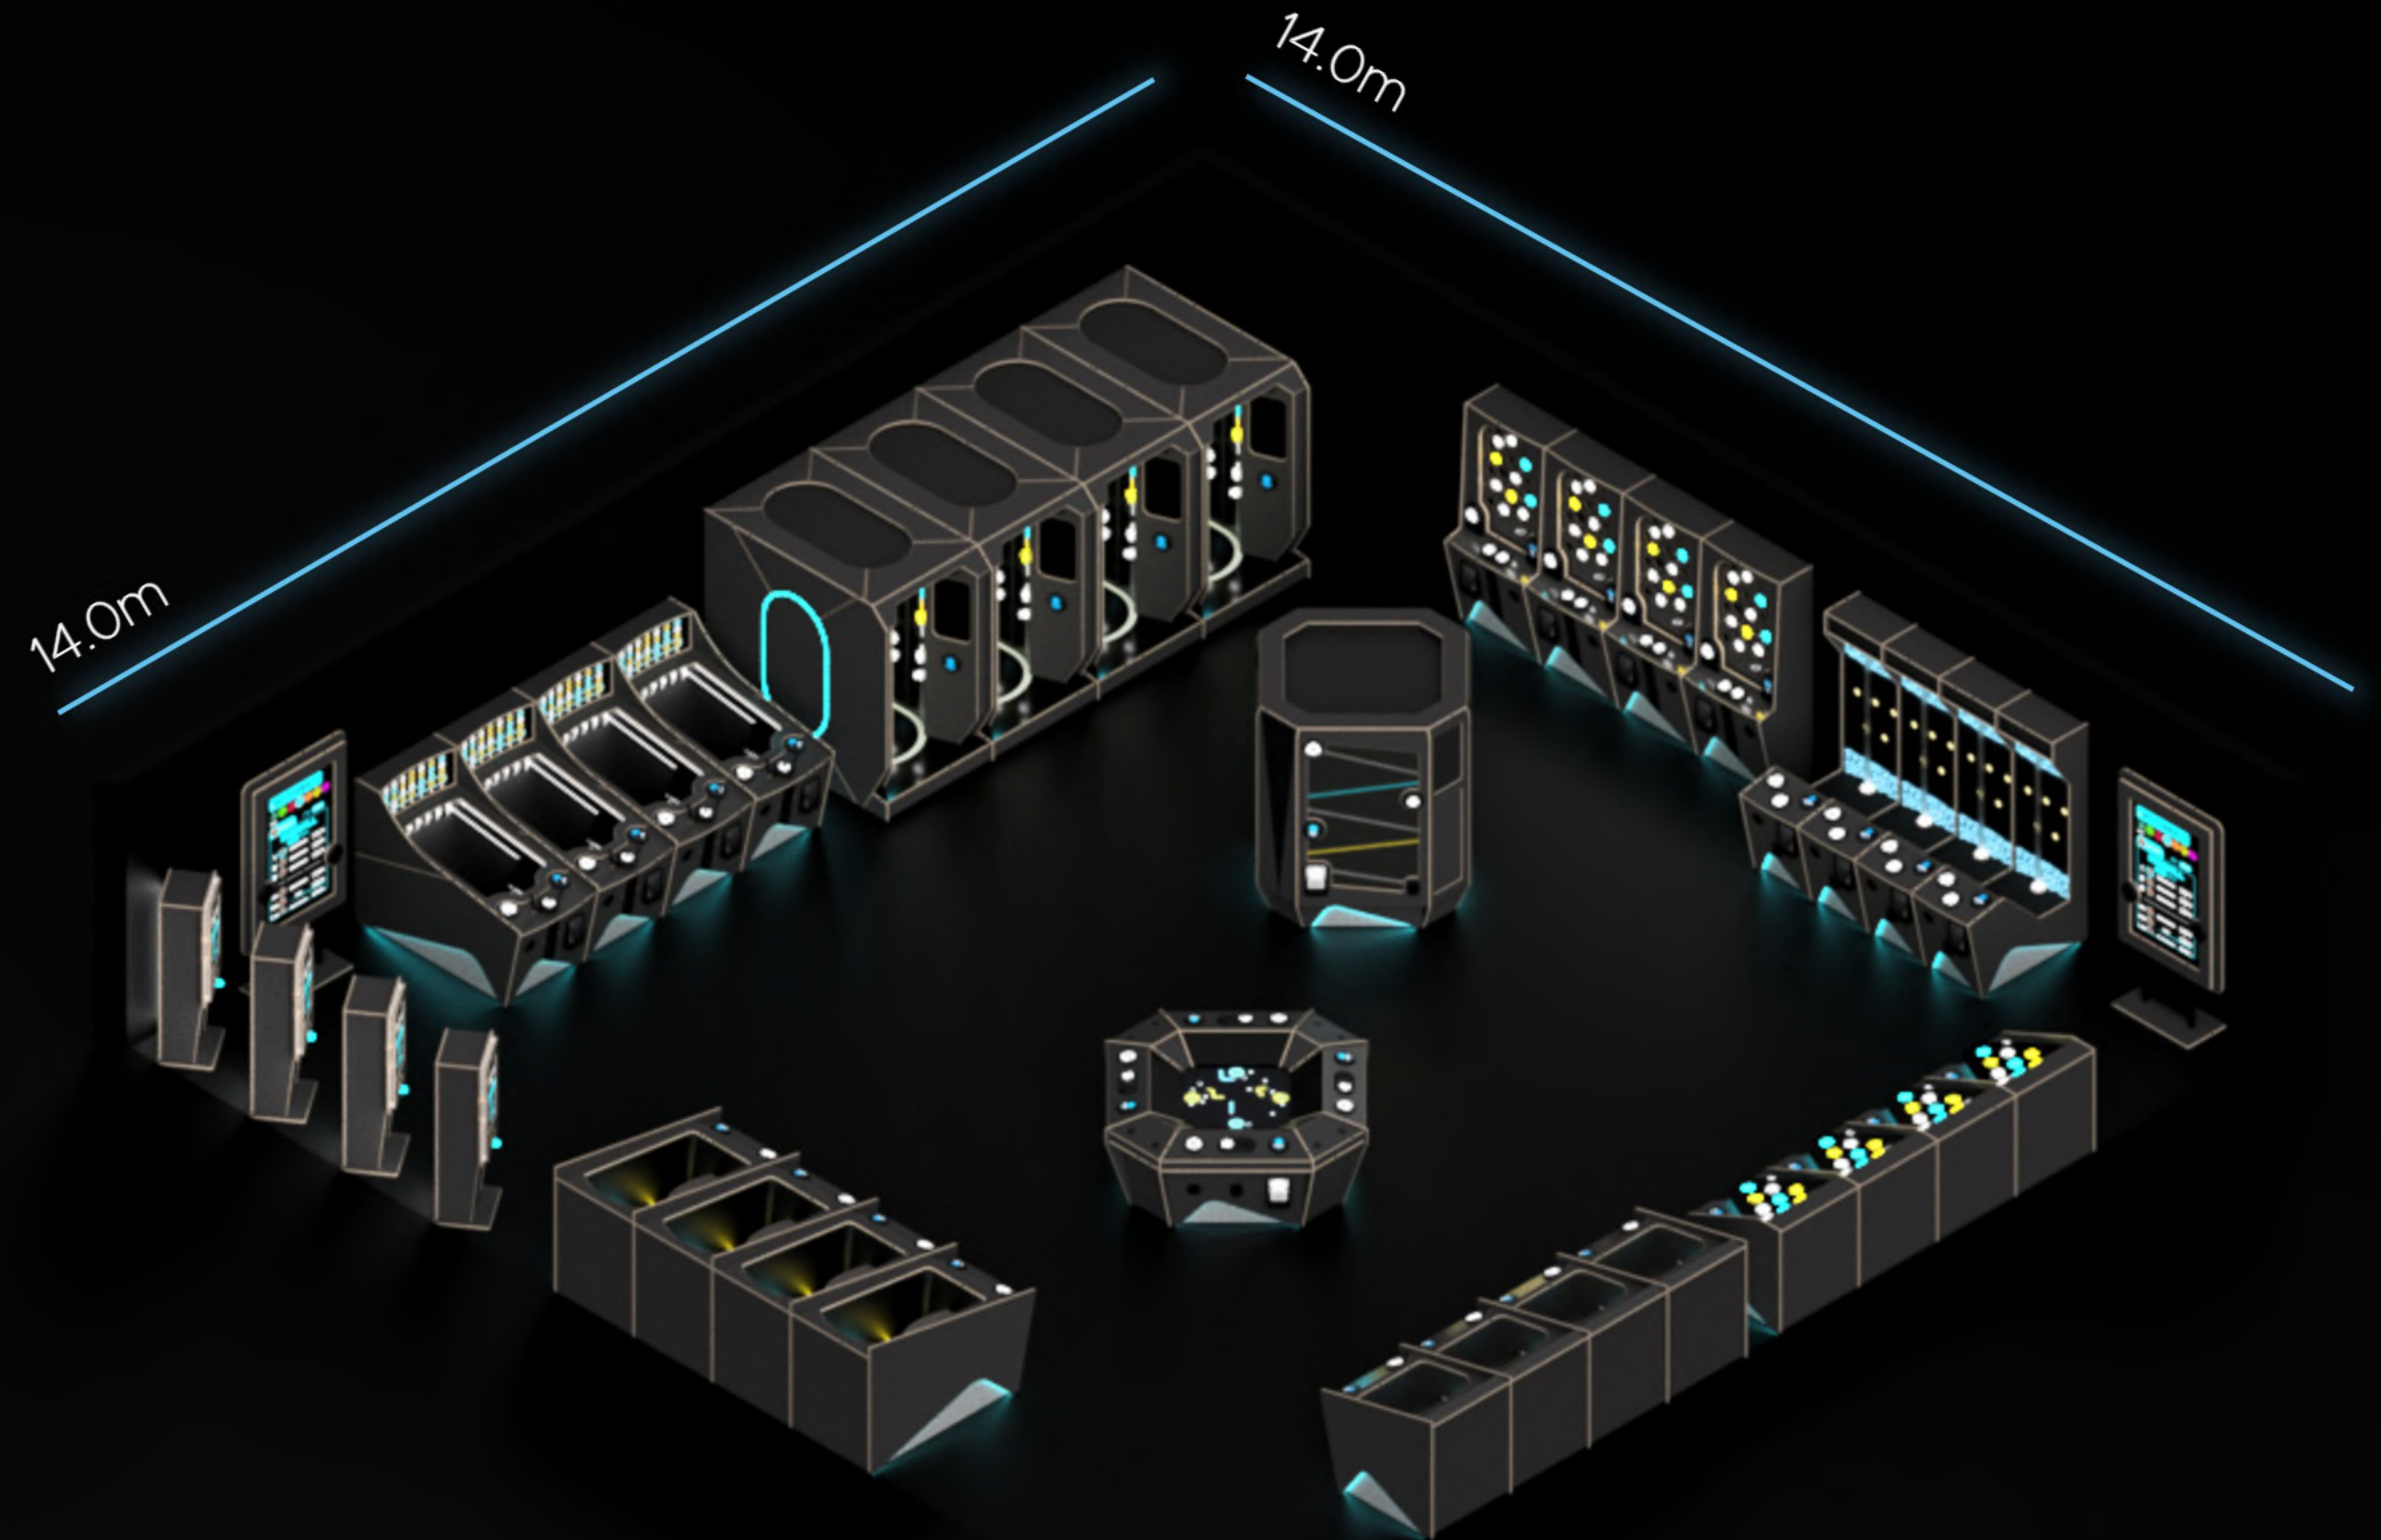

*Revolver
Tilt
React
Digiball*

Our recommendations

To install the Battleball Plus package, we recommend a minimum space of approximately 200sqm.

The Battleball Plus setup can accomodate up-to 36 players simultaneously.

Our packages can be configured to your exact space and price requirements - the Core, Plus and Extreme products are just recommended package options.

BATTLEBALL

EXTREME

Most may call it over the top - but we just call it being the best. Built on our same reliable product ecosystem, the Extreme package features the latest cutting-edge tech to offer the best competitive social experience possible.

Our Extreme configuration includes 6 Check-In Kiosks with Ball Dispensers and 3 Battleboards as standard, as well as 12 of our most popular games.

Each game features four machines and an overhead display system to provide instructions, in-game feedback and live scoring throughout the experience.

EXTREME SPECIFICATIONS

Whats included?

- 6 Check-In Kiosks (Ball Dispensers)
- 3 Battleboards
- 12 4-Player Machines

Example Machines

Capture	Revolver
Match	Tilt
Balance	Floor
Levitate	Drop
Pod	React
Pulse	Digiball

Our recommendations

*To install the Battleball Extreme package,
we recommend a minimum space of
approximately 325sqm.*

*The Battleball Extreme setup can
accommodate up-to 48 players
simultaneously.*

*Our packages can be configured to your exact
space and price requirements - the Core, Plus and
Extreme products are just recommended package
options.*

BATTLEBALL

MACHINES

CAPTURE

A frustrating but extremely fun challenge where every ball you fail to Capture will have you chasing the scoreboard. Control is taken out of your hands on this one, with nature taking it's course on the battlefield.

The leader will be they who captures the most balls in the time given.

Players will control a net to capture as many balls as possible whilst placing them into dynamic goals in the machine to score points.

MATCH

Match is a game of logic, reaction and coordination - fast-paced challenges will be presented to you and the only way you can survive and succeed is by matching your actions with what you see.

Climb to the top by using your reaction time, logic and physical speed.

Players will use their Battleball throughout this challenge by going through physical targets to match on-screen colours with those shown by the targets.

TILT

Take on Tilt, a precision-based challenge where the only goal is to quickly learn the best way to take control, not drop the ball and get the hole.

Beat your opponents by being vigilant, steady and controlled.

Players will control their Battleball by operating joysticks to control a belt-driven ball-lift system, tracked in the digital world, to hit targets, score points and sabotage opponents.

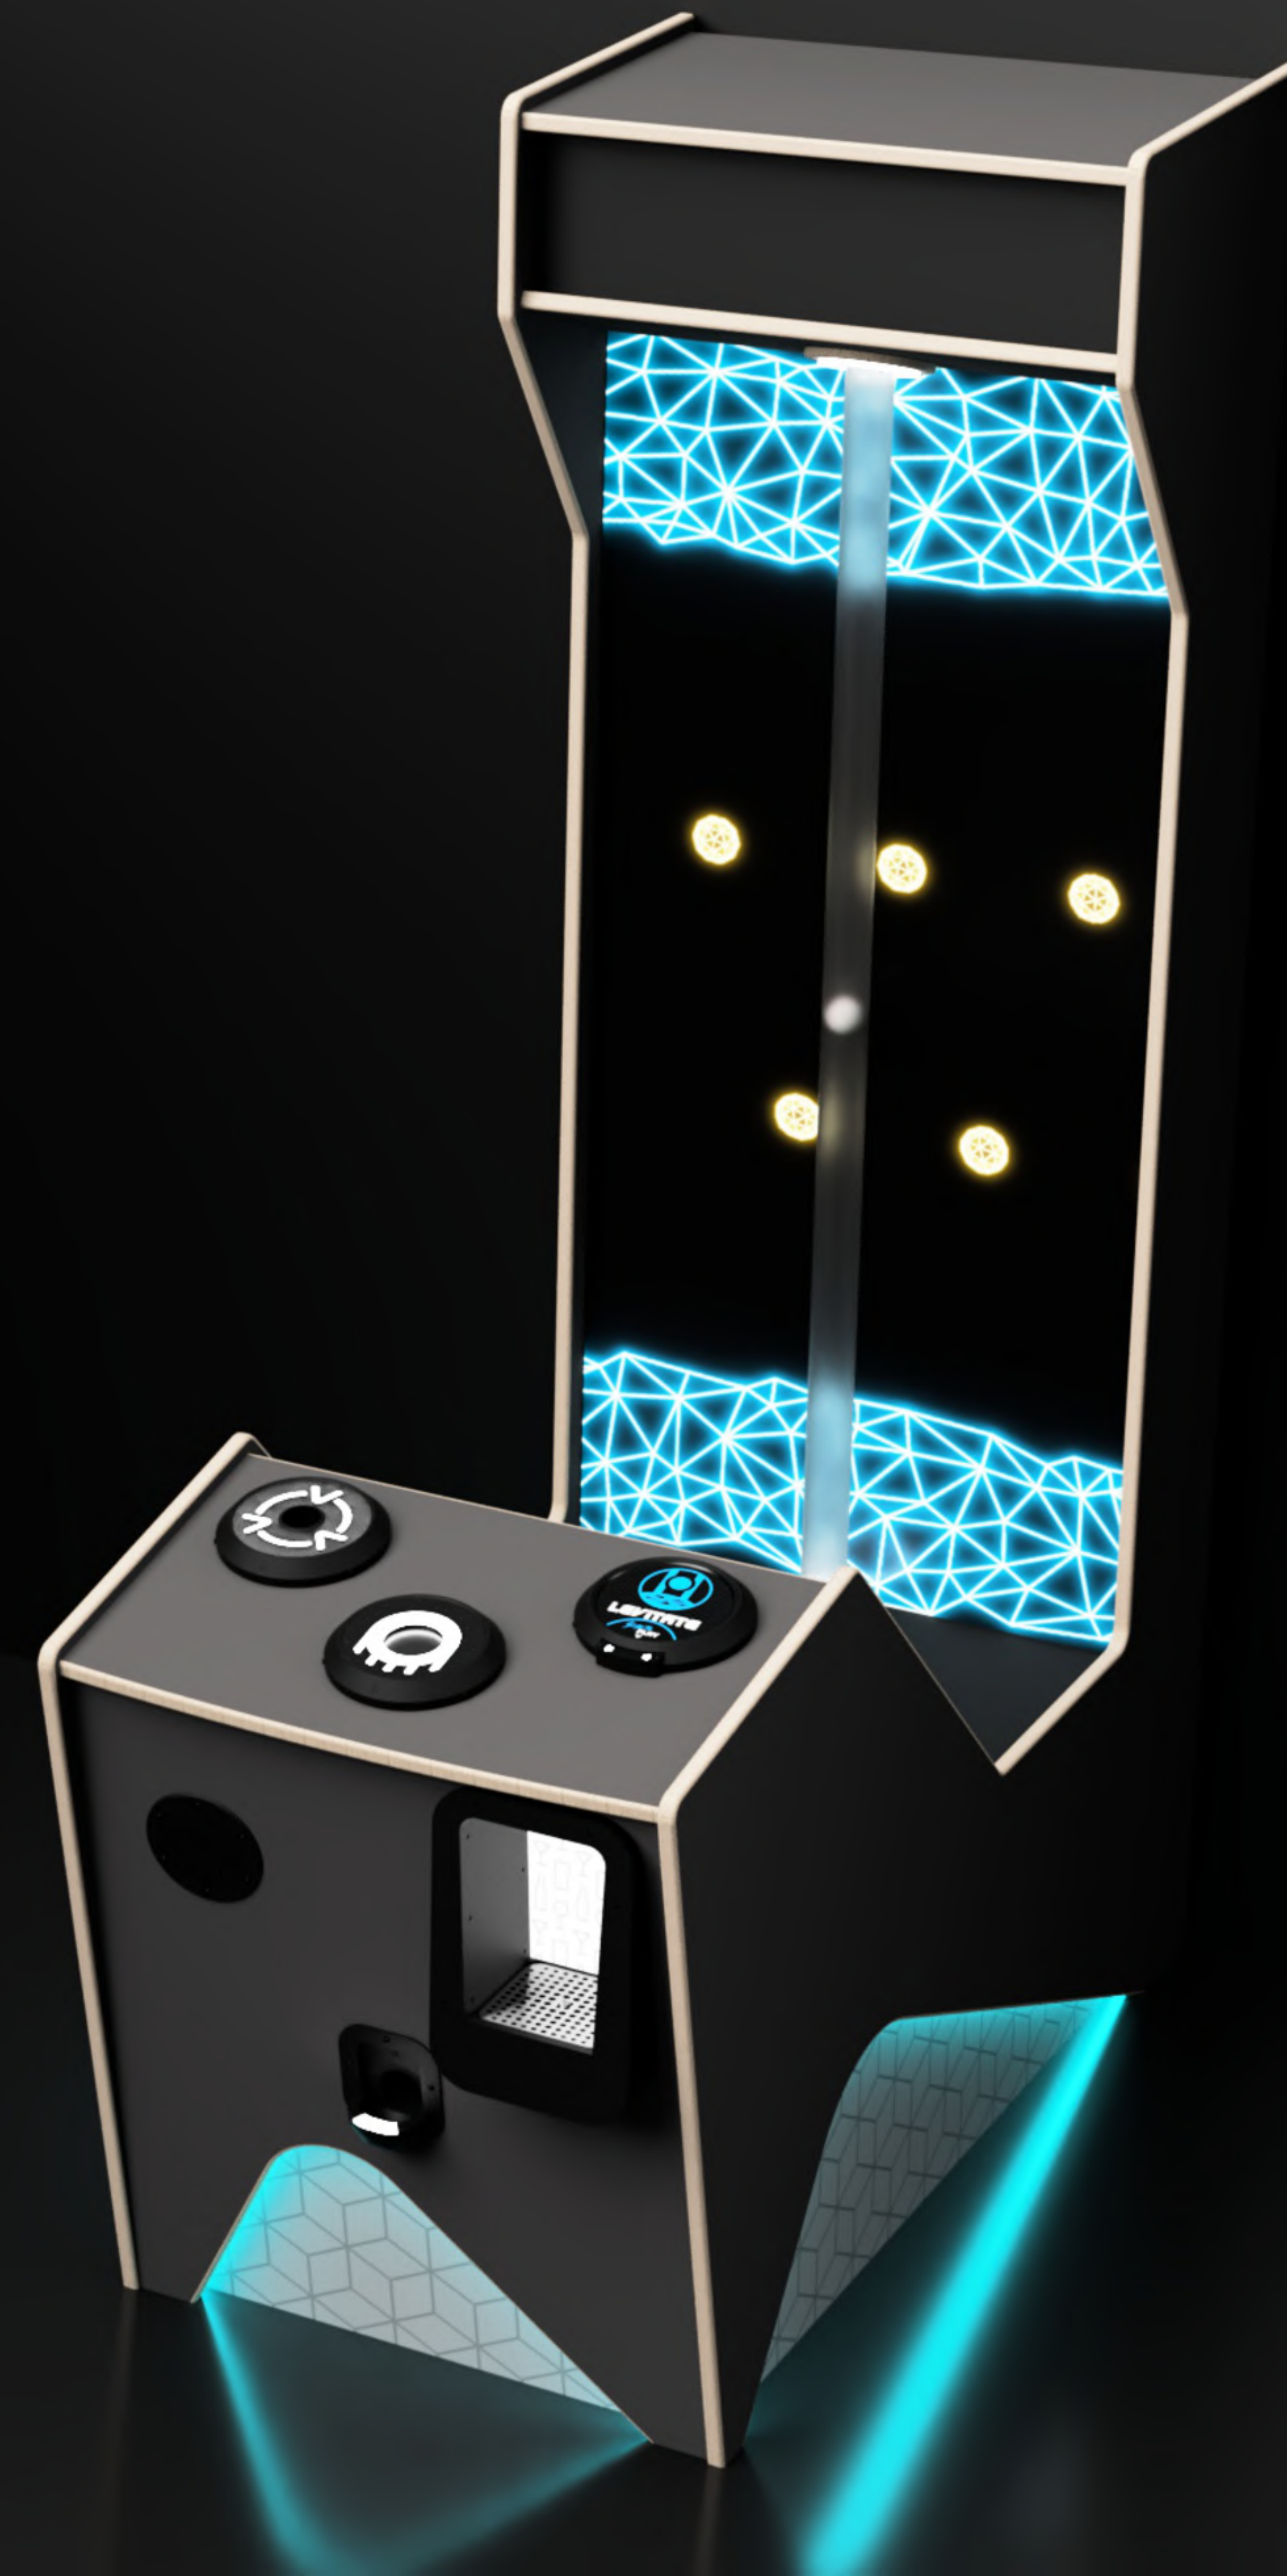

LEVITATE

Summoning the power of the elements, Lift Off will require you to exercise extreme precision, muscle memory and forward-thinking.

Top the Battleboard by being fast, but extremely controlled and tactical.

Players will control their Battleball by physically controlling air-flow, considering both speed and direction, where every movement will take affect in the digital world with their opponents.

REVOLVER

A game requiring patience, accuracy and consistency. Blending the use of a powerful ball-shooter with a versatile digital world, where every shot counts.

Score big by being fast, precise and knowing when not to shoot.

Players will operate an air-powered shooting system to fire their Battleball at dynamic targets to compete with their opponents in a fast-paced game demanding accuracy and speed.

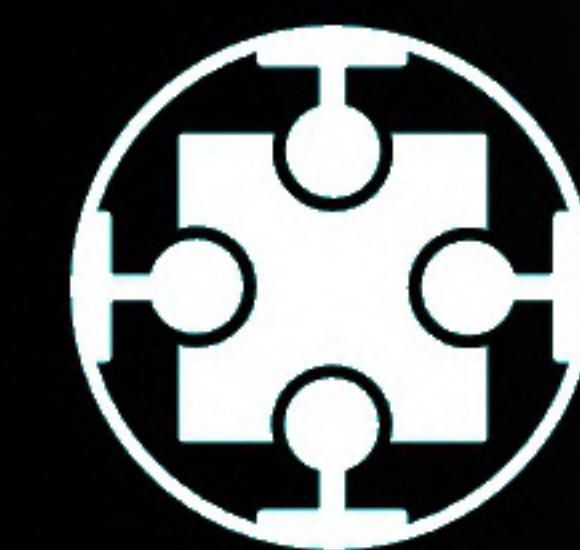

BALANCE

Balance - it's in the name. Take your time, think strategically and balance your way to the finish line. You'll be demanded of physical control every step of the way.

Get points on this one by learning how the ball moves and knowing when to let it go.

Players will use a paddle to delicately control their Battleball along a dynamic path, where dropping the ball will either score them big points, or make the challenge even harder.

DIGIBALL

Take control of your 'Digiball' in the virtual world - harnessing the power of a joystick, you'll be attempting to beat your opponents using strategy and speed on a fully virtual playing field.

To score points here, you'll need to be comfortable with a joystick and be very strategic.

Players will enter their Battleball into the machine - giving them the key to digitally control their position in the play area using a fully interactive joystick.

REACT

Be extremely quick to React, or you'll lose the point. This one is a chase to victory with finite opportunity to score against your opponents - a race based purely on physics and your reactions.

Victory is claimed by the competitor who consistently reacts the quickest.

Players will use their Battleball each round to drop into a maze with interactive targets - each time the ball passes the target, the players reaction speed will be tested.

POD

Enter into a realm where it's you and the ball - keep your eyes tuned and your ears sharp. You'll need your wits about you whilst in the Pod and to act extremely quick on them.

Points are generated by hitting the correct targets, extremely quickly.

Players will enter a futuristic pod, requiring them to insert their Battleball into a selection of gates, controlled by a fast-paced digital game.

The Floor isn't actually lava here, but you will need to be incredibly sharp with your pattern recognition skills in this game to succeed.

Recognising a series of complex patterns and trying to replicate them correctly before your time is up will keep you ahead of your foes on this one.

Players will use the interactive floor screen to match unique patterns shown on the display in front of them - the closest player to the pattern will gain the most points.
